iii) Disposed	NA	NA

PART – F

Please specify the characteristics (in terms of concentration and quantum) of hazardous as well as solid wastes and indicate disposal practice adopted for both these categories of wastes.

1. Hazardous Waste :- NA
2. Solid Waste :- NA
3. Battery Waste :- NA
4. E-waste :- NA

PART-G

Impact of the pollution control measures taken on conservation of natural resources and consequently on the cost of production.

The Fly Ash Silo handling system M/s Mangalam Cement Limited is based on dry material handling mechanism & itself is on environmentally clean technology. The fugitive emission generated from fly ash handling system during ash feeding is controlled by bag filters installed at top of silos & fly ash loading points. Ash collected in bag filters is recycled back in system. Use of fly ash in cement plant helps in natural resources conservation which results in CO₂ emission reduction.

PART – H

Additional measures/investment proposal for environmental protection including abatement of pollution.

PART –I

MISCELLANEOUS:

Any other particulars in respect of environmental protection and abatement of pollution.

1. We have full-fledged Environment Department with three separate cells, for monitoring, maintenance of pollution control equipment and Green Belt development.
2. Monitoring of stack emission and ambient air is being done regularly.
3. Maintenance department is doing regular checking and scheduled maintenance of all the pollution control devices.
4. M/s Mangalam Cement Ltd. taking care of Housekeeping.
