PART-G

Impact of the pollution control measures taken on conservation of natural resources and consequently on the cost of production.

Synthetic Gypsum Plant is being operated on environmentally clean technology. In this project two different industrial wastes i.e. Phospho-gypsum (a waste of phosphoric acid manufacturing plant) and Kota Stone Slurry Powder (a waste from Kota Stone industries) are being used for gainful utilization as synthetic gypsum in our own cement plant; which helps in conservation of natural resources and waste disposal problem simultaneously.

PART – H

Additional measures/investment proposal for environmental protection including abatement of pollution.

Green belt development and tree plantation is our on-going process. We have planted 1315 No's of native species and up to March 2026, 134744 trees have been planted in premises of Unit – I, II, III, CPP – I, CPP – II and colonies.

PART –I

MISCELLANEOUS:

Any other particulars in respect of environmental protection and abatement of pollution.

1. We have full-fledged Environment Department with three separate cells, for monitoring, maintenance of pollution control equipment and Green Belt development.
2. Monitoring of stack emission and ambient air and water quality is being done regularly.
3. Maintenance department is doing regular checking and scheduled maintenance of all the pollution control devices.
4. Civil Department is taking care of Housekeeping, water supply and operation of STPs.
5. Horticulture Department is taking care of tree plantation and green belt development. Every year we are doing tree plantation.
